The rate we pay from the coast when construct these with these figures at with tast disaded the substitution of the contribution of the contributi ared with these figures as with these districts as a schools that opportunities and then another and the same of the continers. Lepostedly this the first great obstacle in the way of teaching. journal has pointed out the feet as a means a morality in the webools is to emission the section is not being that the destiny of the section is not being that the destiny of the section is not being that it is not essently conjected with the section is not seen the conjected with the section is not seen the section of the section is not seen the conjected with the section is not seen th will not pay We may continue t deather a that it was impossible to prove the habits while, but only till we can do better to efterthildess personal chatting a belt changes that can take place in routes of come care without the aid of the collections merce or methods of transportation can place. This was a Mr John on, he is relating us on an equal footing with the wheat growers call in our; but is it is at it at it is a log at 1 to invast. who have the advantage of position with re that some form of I rotes and wors up is nee a

apact to the final market

A cattle raisor of Rastora Oregon says the profits of his beaness have frequently been as many as 40 per cent a year. The statement is most surprising. Under the prices at which heef is now sold, and taking into consideration.

Profits entire of the state cannot frack Cath brising. he fact that in many matazees herds of cattle at must trid a morality which it can track w up without any calculable cost to the without them or give up traches altegether or, the profite of the business particularly Mr Johnson is an earnest christian himself ties where there are small lessor but he sees the dilemma and meets it holdly those localities where the re are small reproem severe weather neight be almost anything
em severe weather neight be almost anything
at restruction of area of gr .ning lands in those
calities where farming speristons may be
wried es, and consumption of the grass by
uried es, and consumption of the grass by
urge hords in these localities where the land is
the sees the discrimination of the grass but he sees the discrimination of the same seems that note of lands in the same seems that a realized personal to the same seems that a reali ocalities where farming sperations may be carried 66, and consumption of the gran by large begins in those idealities where the land is mail for the plongh, is brin ung about a cising of conditions in the production of bed. The acoustion or pentoral life is antocedent to the agricultural, but assume the uniform to the main consistence of the advent of the latter without detailed in the same consecuted by preligious to the agricultural, but assume the unifored to stand to agricultural, but assume the unifored to stand to agricultural, but assume the uniform to the amount of the latter without detailed and the same of the advent of the latter without detailed and the making of homes. The better green of the same seems the same accordance was godies, in that, to condessously the same of the same of the same seems without formal prayer in the same seems family, take all quarter years of the sout of the country is grown at home by the small farmors, instead of heling brought from distant parts. This is an important part of a mescentry system, too, if a locality would utilize all its resources. Fraits will be found in subdivision of the land and in attention to the variety of products by each farmor rather than in a condition which have delived it if a second with the same contained the of the part of our rural population which was delivered. If Jeras called preach which one part of our rural population and the same children to read write a specific part of the same contained the order which one part of our rural population.

which one mart of our rural population are in growing wheat on a vest scale. Those are soming round, and the soone they come the setter. Fruit, wool, flax and mitry products will all have their places in

From this he proceeds to insist and attempts to show that there is a morality not connected
